SUMMARY

Computer Science undergraduate and full-stack developer with hands-on experience building and deploying web applications using React, TypeScript, Node.js, and cloud-backed services. Published safety-engineering researcher with a strong foundation in data structures and algorithms, seeking a Software Engineering Internship / New Grad role.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, HTML, CSS, SQL

Frameworks & Libraries: React, Node.js, Tailwind CSS, Framer Motion, React Query, Java Swing

Tools & Platforms: Git, GitHub, Supabase (PostgreSQL), Vite, Docker, AWS, Netlify

Concepts: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, Responsive Design, Relational Databases, CI/CD Fundamentals

PROJECTS

Personal Portfolio Website

React, TypeScript, Vite, Tailwind CSS, Framer Motion, Supabase

- Engineered a responsive single-page application with React 18 and TypeScript, integrating a Supabase (PostgreSQL) backend for contact-form submissions and dynamic content
- Built an interactive 2D platformer mini-game from scratch on HTML5 Canvas with custom physics, collision detection, and keyboard controls, using no external game libraries
- Optimized rendering performance with Vite code-splitting and hardware-accelerated CSS animations for smooth 60fps scrolling and transitions

Rail Reservation System

Java, Swing, OOP

- Designed a desktop train-ticket booking application in Java Swing supporting seat-availability checks, fare calculation, and booking and cancellation workflows
- Implemented an object-oriented domain model separating UI, business logic, and data layers, and automated generation of printable tickets and e-tickets

Jira's Weather

HTML, CSS, JavaScript, REST API (Live: jirasweb.netlify.app)

- Developed a responsive weather application consuming a third-party REST API to render real-time temperature, humidity, and wind-speed data with asynchronous JavaScript
- Deployed to Netlify with mobile-first responsive layouts, supporting live weather lookups for any city worldwide

EXPERIENCE

Volunteer, Game Fest — American International University-Bangladesh (AIUB) *2025*

- Coordinated technical setup and live troubleshooting of gaming stations and AV equipment for a university-wide festival, resolving hardware and connectivity issues under time pressure to keep all sessions running on schedule
- Streamlined participant registration and event logistics in collaboration with a cross-functional volunteer team, supporting smooth check-in and matchmaking for festival attendees

PUBLICATIONS

"Eid Homecoming Travel Crisis in Bangladesh: Overcrowding, Safety Risks, and a High-Capacity Standing Coach Solution for Bangladesh Railway" — International Journal of Safety Research, June 2026. DOI: 10.11648/j.ijsr.20260102.13

EDUCATION

BSc in Computer Science & Engineering — American International University-Bangladesh (AIUB) *January 2024 – Present*

Expected graduation: 2028 | Relevant coursework: Data Structures, Algorithms, Software Engineering, Databases

CERTIFICATIONS

IT Essentials — Cisco Networking Academy, February 2026

Introduction to Generative AI — Google Cloud, August 2025
